Official information letter about ITALMEC - WWM

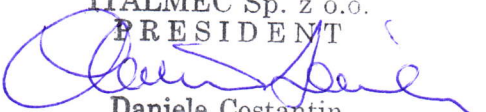

To whom it might concern,

I would like to inform you that thanks to ITALMEC SP. Z O.O., the Company WWM srl (Welding Wire Machineries s.r.l.) continues its activity - production of machinery for the production of welding wires such as: CO2, flux cored wire, sub arc wire, special welding wires, aluminium alloys welding wires, inox etc.

On the 30th of November 2018 ITALMEC bought the brand „WWM”, WWM’s projects and patents/licenses together with the production halls, warehouse and production equipment. All of the above have already been rented by ITALMEC since 2017. ITALMEC continues therefore WWM’s production profile, keeping its production structure in Italy, and continuing the production of drawing machines and plants for other products in Poland. ITALMEC over the years gained significant experience in the production of the machines for low, medium and high carbon wires. Moreover, being WWM’s continuity, ITALMEC focuses not only on product quality, but also on professional and reliable Customer’s service, which is guaranteed by highly specialized staff thanks to whom WWM became an important reference for welding products in the markets all over the world.

I hope that this would be a pleasant information for all previous, current and potential WWM’s Customers. I remain at your disposal for any further clarifications.

Daniele Costantin, President

ITALMEC Sp. z o.o.
